

CTR Title
Aminophylline in bradycardiac arrests: a clinical topic review
Aminophylline in Bradycardiac Cardiac Arrest
Angiotensin Converting Enzyme (ACE) Inhibitor Associated Angioedema
Are routine blood cultures in patients admitted to hospital with community-acquired pneumonia of value in directing management?
Beyond NICE: does the warfarinised patient with mild head injury and normal CT scan require inpatient observation?
Can The Clinical Element Of the Rockall Score Be Used As A Discharge Tool For Patients Attending The Emergency Department with Apparently Minor Upper Gastrointestinal Haemorrhage?
Cardiac Arrest Secondary to Volatile Substance Abuse And The Role Of Adrenaline In It's Management
Clinical Topic Review Heliox in the Management of Acute Asthma
Comparison of Magnetic Resonance Imaging and Bone Scintigraphy in the Diagnosis of Occult Scaphoid Fractures
Computer aided decision support in acute abdominal pain
CPAP versus BIPAP in the treatment of Refractory Acute Cardiogenic Pulmonary Oedema
Debriefing Hospital Staff after Critical Incidents
Diagnostic utility of clinical signs and symptoms in the diagnosis of compartment syndrome of lower limb
Do extremity features aid early diagnosis of meningococcal septicaemia in children?
Do Mechanical CPR Devices offer any clinical advantage over conventional CPR?
Do Non-Steroid Anti-Inflammatory Drugs Delay Fracture Healing?
Does Heliox have a role in acute exacerbations of Chronic Obstructive Pulmonary Disease?
Does Recombinant Factor VIIa improve outcome in upper gastrointestinal bleeding?
Emergency Department early Goal-Directed therapy in Adult Patients with Severe Sepsis and Septic Shock
Emergency Department Management of Acute Thumb Ulnar Collateral Ligament Injuries
Emergency Department three-in-one nerve block for patients with fractured neck of femur
Emergency Neuroimaging in children with New-Onset Afebrile Seizures

GlideScope and the Difficult Airway in the Emergency Department
Home Observation for Children with Oesophageal Coins?
Hypertonic saline for use in the resuscitation of the hypotensive head injured adult
Hypotensive Resuscitation of Blunt Trauma
In Adults who have sustained an out-of-hospital non traumatic cardiac arrest does therapeutic hypothermia improve neurological outcome?
In children with Torus (buckle) fractures of the distal radius, is symptomatic bracing as effective as plaster cast immobilisation in the relieving symptoms and promoting functional recovery?
In Children with torus fracture of the distal radius is a functional splint or POP better for functional recovery?
In fully conscious adult patients with suspected acute drug overdose, is clinical suspicion alone sensitive enough to diagnose significant salicylate toxicity?
In patients presenting to the emergency department with new onset atrial fibrillation does the addition of intravenous magnesium as an adjunct to standard treatment increase the rate of cardioversion or rate control?
In the Emergency Department is Ultrasound Scan Useful in Diagnosing Extremity Fractures
Infusion regimes for intravenous N-acetylcysteine in the treatment of acute paracetamol poisoning
Internal Concealment of Drugs: Which diagnostic test is best?
Intra-Articular Lignocaine versus Intravenous Analgesia with or without Sedation for closed Manual Reduction of Acute Anterior Shoulder Dislocation in Adults
Intravenous drug use and lower limb vein thrombosis
Intravenous Magnesium as an Adjunct in the Treatment of Acute Asthma
Intravenous Paracetamol: An Analgesic for the Emergency Department?
Intravenous propofol & etomidate for adult procedural sedation in the emergency department
Is Aspiration of an Acute Traumatic Knee Haemarthrosis of any Benefit to the Patient in an Emergency Department
Is Early Goal-Directed Therapy for the management of sepsis and septic shock achievable in UK Emergency Departments?

Is Ice Right? Does cryotherapy improve outcome for soft tissue injuries?
Is intravenous Ketamine a safe and effective agent for procedure sedation and analgesia in adults in the emergency department?
Is intravenous paracetamol a safe and effective analgesia for use in Emergency Departments?
Is stapling better than suturing scalp & skin lacerations in the Emergency Medicine Department?
Is there a place for Magnesium Sulphate in the treatment of new onset atrial fibrillation either alone or in conjunction with other antiarrhythmic therapy?
Is there a Role for Empirical Thrombolysis in Non-Traumatic Cardiac Arrest?
Is There A Role For Steroids In The Treatment Of Acute Bronchiolitis In Infants?
Is There a Role of emergency Physician Performed Compression Ultrasound in the Diagnosis Of Deep Vein Thrombosis?
Is there any evidence for the use of Non rectal transmucosally administered Midazolam in the treatment of Acute Seizure Disorder in Children presenting to the Emergency department?
Is There Anything to Be Gained From Emergency Physicians Performing focused Assessment with Sonography For Trauma (Fast) In Paediatric Abdominal Trauma
Keeping Cool: The Use of Therapeutic Hypothermia in Adults with Traumatic Brain Injury
LAT topical anaesthetic compared to Lidocaine local infiltration alone for sutures in children
Management of Isolated Sternal Fracture
Manipulation of Distal Radius Fractures in the ED, for safety and efficacy should we use Biers block or Haematoma block?
Measurement of intra-ocular pressure as a non-invasive marker of intracranial pressure
Nasal Packing in Acute Spontaneous Epistaxis in Adults
NICE Guidelines on the Management of the Head injury Patient
Petechial Rash in Children - Safe discharge from the Emergency Department
Pre-Hospital use of Intranasal Naloxone in Suspected Opioid Overdose
Preventive Services and Health Promotion in the Emergency Department

Radial Head Subluxation (Pulled Elbow): a review of the management of a common children injury.
Rapid Sequence Induction and Emergency Physicians
Risk Scoring Systems in Ruptured Abdominal Aortic Aneurysms
Role of Tubgrip in Mild Ankle Injuries
S-100B as a diagnostic Test for Subarachnoid Haemorrhage
Should Adrenaline be withheld In Out-Of-Hospital Non-Traumatic Cardiac Arrest In Adolescents?
Should emergency physicians do rapid sequence intubations?
Should N-acetylcysteine be administered orally or intravenously for the treatment of paracetamol overdose?
Sonography For Blunt Abdominal Trauma By Emergency Physician. Fast or Flash
Sublingual Captopril in Acute Heart Failure
The diagnostic utility of lateral neck radiograph in assessment of fishbone impaction
The Effect of Therapeutic Hypothermia on Neurological Outcome after Cardiac Arrest
The Effects of Brief Interventions on Alcohol Misusing Patients in the Emergency Department
The Efficacy of Intravenous Magnesium Sulphate in the Treatment of Stable Patients with Atrial Fibrillation and a Rapid Ventricular Response Rate
The evidence for intranasal opioid analgesia as relevant to UK Emergency Department practice
The position of Immobilisation After Shoulder Dislocation
The role of recombinant activated Factor VII in trauma resuscitation
The Role of Amiodarone in Out of Hospital Cardiac Arrest
The role of Heliox in Asthma
The Role of Intravenous Bolus Salbutamol in the treatment of Severe Acute Asthma in Children
The Role of Intravenous Magnesium in Childhood Asthma
The role of MRI in the detection of occult hip fractures
The Role of Non Invasive Treatment Options in a Case of Foreign Body Obstruction in the Oesophagus
The role of recombinant factor VIIa in the management of life threatening haemorrhage
The Role of the Thoracic Ultrasound in the Diagnosis of Adult Traumatic Pneumothoraces

The role of Therapeutic Hypothermia in Traumatic Brain Injury in Adults
The role of Thoracic Ultrasound in the Diagnosis of traumatic Pneumothorax
The Role of Thrombolysis in Cardiac Arrest
The Use of B Type Natriuretic Peptide in the Diagnosis of Acute Left Ventricular Failure in the Emergency Department
The use of heliox as the updraft gas for nebulising B2 agonists in exacerbations of asthma
The use of Hyperinsulinaemic Euglycaemia in the Treatment of Calcium Channel Blocker Overdose
The use of magnesium sulphate in new onset atrial fibrillation with rapid ventricular response
The use of Ultrasound in the management of Paediatric ankle sprains
Transient Synovitis Versus Septic Arthritis: Where Do We Stand?
Transmucosal Benzodiazepines For Prolonged Seizures in Children
Transmucosal Benzodiazepines for Prolonged Seizures in Children - Which Drug? Which Mucosa
Use of Computed Tomographic Angiography in Diagnosis of Traumatic Carotid Artery Dissection
Use of intravenous magnesium sulphate in the treatment of acute asthma in adults
Use of Intravenous Magnesium in Acute Myocardial Infarction
Use of Nebulised Adrenaline in Acute Bronchiolitis
Using Procalcitonin in the Emergency Department to Identify Which Febrile Children With No Obvious Source Of Infection Have a Serious Bacterial Infection
What is the role of combined H1 and H2 antagonists in adults with acute reactions?
Which is the Most Appropriate First Line Treatment for Acute Otitis Externa and What is the Evidence to Support This?
